

SIEMENS

2N Intercom system integrated with Siveillance™ Video by Siemens for efficient entrance monitoring and remote door control.

Integration benefits

- | Siveillance™ Video represents a single management interface for monitoring intercoms together with other IP cameras.
- | The Onvif Profile S enables video and audio streaming to the Siveillance Video Client
- | Real-time visual verification and communication with visitors in high quality
- | Events from 2N devices are linked with actions in Siveillance™ Video
- | Graphical floorplans for improved situational awareness with device monitoring and instant control

Unified video monitoring in Siveillance™ Video

Realtime event logs from 2N devices tied into live video

Video monitoring from 2N IP intercoms together with other IP cameras

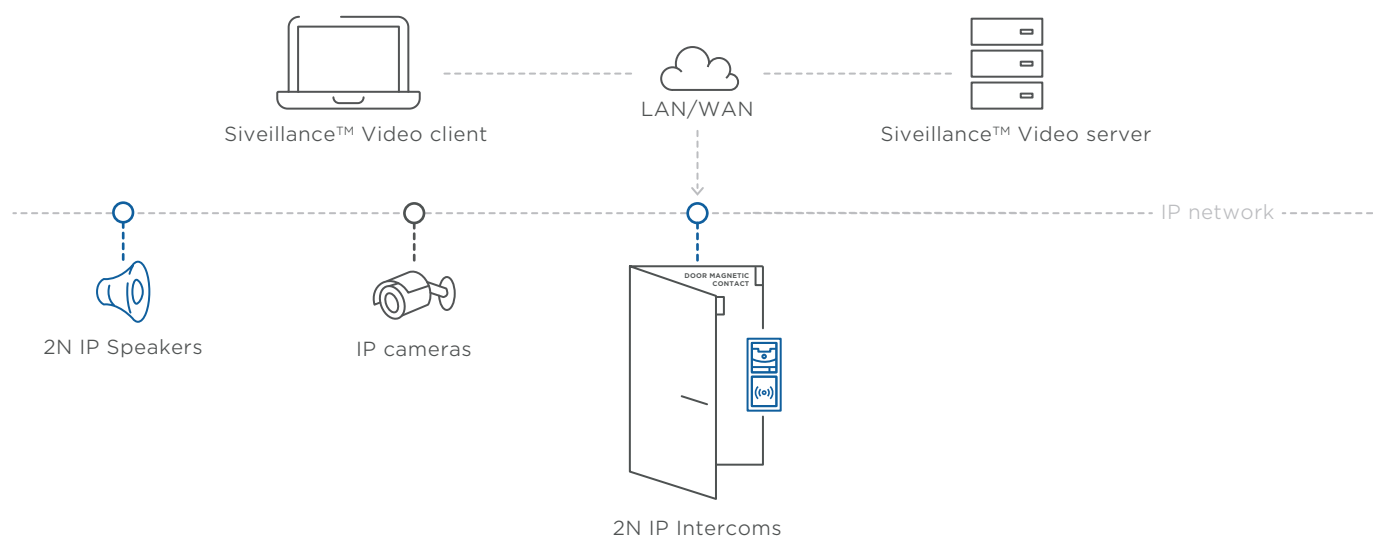

Remote door lock control

Identification and communication with visitors

Device monitoring through the graphical maps

How it works
